

zoomone

One solution for meetings, chat, whiteboard, phone, and more

Make connections that matter with an all-in-one communications solution

Zoom One bundles everything you need to communicate and collaborate with internal and external teams. Have face-to-face interactions over video, place a call from your mobile device, brainstorm on a whiteboard, and send files over chat - all from a single solution. It's intuitive user experience makes it easy to get users onboarded and simplifies management. Secure and scalable, Zoom One solutions can safely work from anywhere and grow to support your needs. With over 1,500 apps and integrations, you can seamlessly integrate into your existing business processes and reduce app fatigue.

- + **Simple:** We make it easy for you to purchase, get started, and use. With smart features and an intuitive user experience, you'll save time, reduce costs, and increase productivity.
- + **Flexible:** Zoom One gives you multiple plans to choose from so you can support your unique needs. It's also extendable with options for Zoom Webinars, Rooms, Events as well as additional calling plans, integrations, hardware, and more.
- + **Transparent:** Our inclusive bundles come without hidden fees or the need for a bunch of add-ons. Add users as needed and benefit from new features monthly.

Zoom One Products

Zoom Meetings

Bring teams together over video with smart features that make it easy to share information and look and sound your best.

Zoom Chat

Group and 1:1 messaging to keep projects moving outside of calls and meetings with file sharing, integrations, and more.

Zoom Whiteboard

Brainstorm, share ideas, and plan with our virtual whiteboard that works across devices and products.

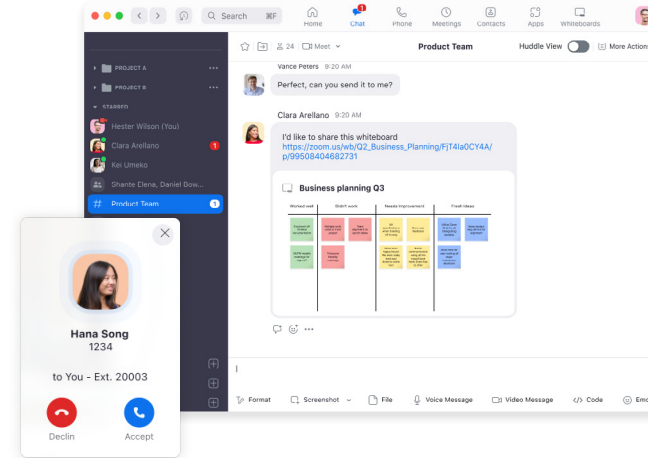

Zoom Phone

Place and accept calls from your desk phone, mobile or softphone, send SMS texts, and manage multiple calls at once with ease.

The power of an all-in-one solution

Purpose-built for you to work effortlessly across products

- One app for you to meet, chat, talk, and collaborate from
- Work from anywhere with support for softphone, web, desktop, and mobile
- Manage all of your tools from a simple, web-based portal
- Elevate a chat to a meeting or phone call to get answers fast
- Swap between your desktop and mobile app with a single click
- Send a video voicemail or message for asynchronous communications
- Share a whiteboard in a meeting and send it afterwards via chat

Work in ways you prefer

Expand capabilities across locations, devices, and tools

- Our marketplace provides a variety of native integrations, apps, and bots so you can automate the way you work and minimize the need to flip between applications
- Partnerships with leading hardware providers for desk phones, headsets, cameras, conference room support, and homes
- Support for other Zoom products such as Rooms, Webinars, Events, and Contact Center
- Developer tools, APIs, and SDKs to plug your favorite Zoom solutions into your unique workflows

Share information securely

Enterprise-grade security and compliance

+ Security

Safely share files with the ability to enable advanced chat encryption and simplify password management with SSO and multi-factor authentication.

+ Compliance

Industry-recognized certifications and attestations such as SOC 2 and controls that help enable customer compliance with GDPR, FERPA, and HIPAA.

+ Data Storage & Privacy

Real-time settings give you the ability to decide where things are stored and how long they're stored for, plus admin restrictions and external contact permissions.
